

## Challenge Coin Cardholder

**Print out your template.**

**Ensure you print it out at 100% scale.**

**Tape template down to leather and cut out the pieces.**

**Sand, Bevel, and Burnish the tops of the card/coin slots**

**Attach the coin pocket to one of the card pockets by gluing around the edges and sticking them together.**

**Measure halfway on the coin pocket (it should be 2.25 inches) and mark a stitch line with your ruler**

**Punch holes and stitch a line to separate the two coin slots**

**Mark the other card slot with your maker's mark if you have one**

**Glue the card pockets to the main wallet body**

**Punch your stitching holes - on the side with the coin pocket, just stitch up to the stitch line that separates the coins on either side (don't go all the way around with 1 continuous stitch line)**

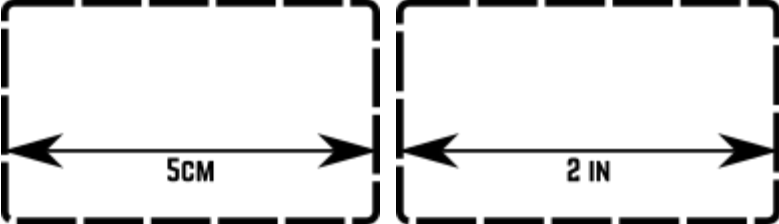

**Stitch it all up!**

**Sand, bevel, and burnish the edges.**

**Apply leather balm if using**

**Insert badass challenge coins**

**When printing, make sure to print the true size. Measure below to ensure the image hasn't been scaled:**

**WALLET BODY**

**COIN SLOT**

**CARD SLOT**

**CARD SLOT**
